

Test Plan: Swag Labs (SauceDemo)

Prepared By: Zaid Alabed

Date: 28/01/2026

Application (Website): SauceDemo

1. Introduction

The purpose of this plan is to define how we will test the **SauceDemo** website, The main goal is to verify that a user can successfully log in, browse products, and complete a purchase without errors.

We will also check how the site handles different user scenarios (like locked-out users).

2. Scope (What to Test)

I will focus on the **End-to-End (E2E) flow** of the application.

In-Scope:

- **Login Page:** Testing valid and invalid credentials.
- **Inventory Page:** Adding/removing items, sorting products (Price/Name).
- **Cart Page:** Verifying item details and quantity.
- **Checkout Process:** Step 1 (Info), Step 2 (Overview), and Confirmation.
- **Sidebar Menu:** Logout and Reset App state functionality.

Out-of-Scope:

- Performance Testing (Load/Stress).
- Payment Gateway processing (since it is a mock website).
- Backend Database verification (Black-box testing only).

3. Test Environment

- **URL:** <https://www.saucedemo.com>

- **Browser:** Google Chrome (Latest Version) or Microsoft Edge.
- **Devices:** Desktop / Laptop.

4. Test Data

I will use the predefined data provided on the homepage:

- **Standard User:** standard_user (For all Happy Path scenarios).
- **Locked User:** locked_out_user (To verify error messages).
- **Problem User:** problem_user (To identify UI bugs and broken images).
- **Password:** secret_sauce

5. Testing Strategy

- **Manual Testing:** I will execute test cases manually to ensure the UI behaves as expected.
- **Functional Testing:** Verifying that buttons, inputs, and links work correctly.
- **Negative Testing:** Trying to break the flow (e.g., empty fields in checkout, wrong password).
- **Bug Reporting:** Any issues found will be documented with Screenshots and Steps to Reproduce.

6. Risks

- **Data Reset:** The website is a public demo and does not save order history after the session ends, Tests must be completed in one session.

7. Deliverables

At the end of testing, I will provide:

1. **Test Cases Suite** (Excel file).
2. **Bug Report** (if any defects are found).
3. **Test Summary** (Simple Pass/Fail count).

Happy And Negative Paths:

ID	Type	Feature	Scenario Description	Expected Result
TS01	Happy	Login	Login with Valid Credentials Enter valid username (standard_user) and password (secret_sauce).	User is redirected to the Inventory page successfully.
TS02	Negative	Login	Login with Invalid Password Enter valid username but wrong password.	Error message Epic sadface: Username and password do not match is displayed.
TS03	Negative	Login	Login with Locked Out User Enter locked_out_user and valid password.	Error message Epic sadface: Sorry, this user has been locked out is displayed.

ID	Type	Feature	Scenario Description	Expected Result
TS04	Negative	Login	Login with Empty Fields Leave both Username and Password fields empty and click Login.	Error message Epic sadface: Username is required is displayed.
TS05	Happy	Inventory	View Product Details Click on any product name (e.g., Sauce Labs Backpack).	User is taken to the product details page showing correct name, price, and description.
TS06	Happy	Inventory	Sort Products (Low to High) Select Price (low to high) from the filter dropdown.	Products are reordered starting with the cheapest item first (\$7.99).

ID	Type	Feature	Scenario Description	Expected Result
TS07	Happy	Cart	Add Item to Cart Click "Add to cart" on a product.	Cart badge counter increases by 1, and button changes to Remove.
TS08	Happy	Cart	Remove Item from Cart Click Remove on a product already in the cart.	Cart badge counter decreases, and button reverts to Add to cart.
TS09	Happy	Checkout	Valid Checkout Information Enter valid First Name, Last Name, and Zip Code, then click Continue.	User proceeds to the Checkout: Overview page.

ID	Type	Feature	Scenario Description	Expected Result
TS10	Negative	Checkout	Checkout with Missing Information Leave Last Name or Zip Code empty and click Continue.	Error message Error: Last Name is required is displayed.
TS11	Happy	Checkout	Complete Purchase (Finish) Click Finish on the Overview page.	Thank you for your order! message is displayed with a dispatch image.
TS12	Negative	Security	Direct Access URL Try to access /inventory.html directly without logging in.	User is denied access and redirected back to the Login page with an error.
